

CARLOS JOEL DÍAZ ROSERO

Software Engineer | Backend | Cloud | Data Engineering | AI

Java | .NET | Node.js | AWS | Azure | GCP | Data | Generative AI

Quito, Ecuador | +593 995 209 098 | jldiaz1993@gmail.com | linkedin.com/in/cjoeldiaz | github.com/JoelDiaz93 | carlosdiazec.com

PROFESSIONAL SUMMARY

Software Engineer with 9+ years of experience delivering web, backend, cloud, data, and integration solutions, with strong exposure to financial services and COBIS core banking. Professional experience with Java, C#, .NET, Node.js, TypeScript, AWS, and Azure DevOps, as well as Python automation, serverless architectures, CI/CD, security, testing, and support for mission-critical processes. Complemented by training and projects in Data Engineering, Business Intelligence, and AI applied to software development, including agents, LLMs, automation, and test generation. Focused on problem solving, operational continuity, quality, traceability, effective communication, and cross-functional collaboration.

AREAS OF EXPERTISE

Backend Engineering | Banking Technology | Cloud & Serverless | Data Engineering & BI | DevOps & CI/CD | Generative AI & Automation | Software Architecture | Security & Quality

TECHNICAL SKILLS

Backend & Architecture: Java, Spring Framework, Spring Boot, JDBC, C#, .NET/ASP.NET Core, Node.js, Python, TypeScript, NestJS, REST APIs, GraphQL, Swagger/OpenAPI, Entity Framework Core, Clean Architecture, Domain-Driven Design (DDD), MediatR, SOLID, system integration, and microservices.

Cloud & Serverless: AWS Lambda, S3, API Gateway, Step Functions, Secrets Manager, KMS, CloudWatch, IAM, VPC, RDS, DynamoDB, ECS, Fargate, AWS Batch, AWS CLI, Azure, and Google Cloud Platform (GCP).

Data Engineering & BI: Data Lake, ETL/ELT, Data Pipelines, Data Ingestion, Data Transformation, Batch/Streaming, Databricks, Apache Spark, AWS Glue, Amazon Athena, Amazon Kinesis, Google Cloud Dataflow, SQL, PostgreSQL, MySQL, MongoDB, Power BI, dashboards, reporting, KPIs, and data visualization.

Generative AI & Automation: Anthropic Claude, Claude Code, Anthropic API, Google Gemini, Vertex AI, Amazon Bedrock, n8n, AI Agents, Agentic Workflows, RAG, MCP, Function Calling, Structured Outputs, Prompt/Context Engineering, LLM integration, AI-assisted testing, and AI-assisted software development.

DevOps & Platform: Azure DevOps, Azure Pipelines, Azure Release Pipelines, Jenkins, Git/GitHub, CI/CD, Docker, Docker Compose, AWS CDK, CloudFormation, deployment automation, and DEV/QA/PROD environment management.

Testing & Security: Jest, JUnit, NUnit, Playwright, Cypress, Selenium, Serenity BDD, unit/integration/E2E testing, SCA, JFrog Xray, Checkov, vulnerability analysis and remediation, Container Security, IAM, KMS, and secure secrets management.

Frontend, Mobile & Systems: Angular, Angular CLI, React, React Hooks, Next.js, JavaScript, TypeScript, HTML, CSS, React Native, Flutter, Firebase, Linux, and scripting/CLI.

PROFESSIONAL EXPERIENCE

Full Stack Developer / Backend & Cloud | Bee Consultoría y Negocios - Banistmo Projects

Nov 2024 - Present

Quito, Ecuador

- Develop and maintain solutions for Banistmo across Foreign Trade, Lending, and COBIS core banking; handle production incidents, perform root-cause analysis, and coordinate with functional, infrastructure, security, and compliance teams.
- Designed and implemented the Moody's CreditLens bidirectional S3-SFTP flow using AWS Lambda, Node.js/TypeScript, Secrets Manager, KMS, CloudWatch, VPC, and IAM; including financial-file validation, transformation, traceability, retries, and controlled reprocessing.
- Contributed to Kuaia, a Full Stack platform integrated with an AI management layer to support QA environment certification, generate test cases, and execute automated testing with Playwright and Serenity.
- Automated client and ATM-area processes with Python, including consolidation of Excel/CSV files from providers and cash-in-transit companies, and generation of daily, weekly, and monthly reports.
- Automated foreign-exchange processes and provided technical consulting to core banking on availability; analyzed and validated data collected from strategic points and multiple platforms to support electronic payments and credit-card processes.
- Maintain CI/CD pipelines in Azure DevOps for DEV, QA, and production using Azure Pipelines/Releases, deployment controls, SCA, JFrog Xray, Checkov, dependency pinning, and certification evidence.
- Develop unit and integration tests for critical components, with 100% coverage reported in the main test suites of one project, as well as technical documentation and knowledge transfer.

Software Developer | Clear Minds Consultores - Cobis Topaz

Sep 2022 - Nov 2024

Quito, Ecuador

- Developed and implemented components for financial applications integrated with core banking systems, focusing on performance, maintainability, and clean architecture.
- Executed unit and integration testing and implemented automation with Serenity BDD and Jenkins within the CI/CD process, helping detect defects earlier.
- Analyzed and resolved issues across development, certification, and production, collaborating with technical, functional, and quality teams.
- Documented technical and functional flows to support knowledge transfer and solution maintenance.

Quito, Ecuador

- Gathered requirements, designed software architectures, and developed web applications and APIs, database integrations, automation, and support solutions for hotels, tourism companies, distributors, educational institutions, and clinics.
- Performed technical and SEO optimization for websites, achieving approximately 30% increases in site visits.
- Improved booking platforms, contributing to an approximately 25% increase in hotel reservations during the first year.
- Provided technology consulting aligned with business objectives, user training, quality control, and operational-process improvement.

FEATURED PROJECTS

Moody's CreditLens: Serverless, event-driven integration for S3-SFTP transfer of financial information using AWS Lambda, Node.js/TypeScript, Secrets Manager, KMS, CloudWatch, validations, traceability, retries, and controlled reprocessing.

Kuaia - AI for QA Certification: Full Stack platform integrated with an AI management layer to support QA environment certification, test-case generation, and automated testing with Playwright and Serenity.

ATM Automation & Reporting: Python processes that consolidate Excel/CSV files from providers and cash-in-transit companies, with automated daily, weekly, and monthly report generation.

Foreign Exchange, Payments & Multi-source Validation: Automation of foreign-exchange processes, core-banking availability consulting, and validation of data from multiple platforms to support electronic payments and credit-card processes.

EDUCATION

Higher Technical Degree in Software Development | Escuela Politécnica Nacional | 2019 - 2022

SELECTED CERTIFICATIONS & TRAINING

DATA & AI: Data Engineering and Artificial Intelligence in the Cloud - CIIP LATAM (2026).

POWER BI: Power BI - Basic to Advanced - CIIP LATAM (2026).

ANTHROPIC: Claude 101 + Claude Code in Action - Anthropic (2026).

JAVA: Java - From Zero to Expert; Java SE - Udemy (2026).

SPRING: Spring Framework and Spring Boot; JDBC - Udemy (2026).

ANGULAR: Angular - From Zero to Expert - Udemy (2025).

REACT: React: From Zero to Expert, Hooks and MERN - Udemy (2024).

REACT NATIVE: The Complete React Native Course - Udemy (2026).

TYPESCRIPT: TypeScript: Complete Guide - DevTalles (2024).

PYTHON: PCAP: Programming Essentials in Python - Cisco Networking Academy (2021).

LINUX: Linux Essentials + NDG Linux Unhatched - Cisco Networking Academy (2020).

AGILE: Product Management with Agile Methods - EducaciónIT (2021).

AWS FOUNDATIONS: AWS Cloud Practitioner Essentials - AWS Training (2025).

AWS LAMBDA: Lambda Foundations + Lambda Function Security & Defense in Depth - AWS (2025).

AWS ORCHESTRATION: Introduction to Step Functions + AWS Step Functions Getting Started - AWS (2025).

AWS SERVERLESS: Introduction to Serverless Development + Serverless Mindset - AWS (2025).

AWS CONTAINERS: Amazon ECS + AWS Fargate + Container Security - AWS (2025).

AWS DATA/SERVICES: AWS Batch + DynamoDB + API Gateway + AWS CLI - AWS (2025).

AWS DATABASES: AWS RDS with MySQL from Scratch (2021).

.NET ARCHITECTURE: Clean Architecture + DDD + EF Core + MediatR - ASP.NET Core/.NET 8 (2024-2025).

.NET APIs: ASP.NET Core Clean Architecture 2 | Specification | GraphQL (2024).

.NET CORE: ASP.NET Core MVC and C# Bootcamp (2023).

CYBERSECURITY: Cybersecurity Essentials + Introduction to Cybersecurity - Cisco (2021).

SECURITY & PRIVACY: Ethical Hacking / Red Team | Information Security & Privacy | Kali Linux.

CLOUD FOUNDATIONS: Cloud Computing - Google Actívate | Cloud Computing Fundamentals - Fundación Carlos Slim.

PROFESSIONAL COMPETENCIES

Effective communication | Critical thinking | Problem solving | Root-cause analysis | Collaborative leadership | Ownership | Adaptability | Continuous learning | Teamwork | Cross-functional collaboration | Priority management | Results orientation | Incident management under pressure | Decision making | Negotiation | Conflict management | Technical and executive communication | Customer orientation | Knowledge transfer | Scrum/Kanban

Languages: Spanish - Native | English - B2
